PROFESSIONAL SUMMARY

Python Full-Stack Developer with 2+ years of experience designing and developing scalable backend systems, RESTful APIs, AI-powered applications, and automation solutions. Proficient in FastAPI, Django, React, MySQL, and modern AI technologies including LangChain, LangGraph, Retrieval-Augmented Generation (RAG), and Large Language Models (LLMs). Experienced in building production-grade applications, integrating cloud and local AI models, optimizing data processing workflows, and collaborating in Agile development environments. Passionate about backend engineering, AI systems, and scalable software architecture.

EXPERIENCE

Software Engineer | Fidel Softech Pvt. Ltd.

Jan 2024 – Present

Pune, Maharashtra

- Working as a Python Full-Stack Developer, building scalable backend services, automation solutions, and production-grade web applications.
- Designed and developed RESTful APIs using FastAPI and Django, implementing authentication, request validation, exception handling, and modular architecture.
- Developed automation solutions for processing large volumes of structured and unstructured data, significantly improving operational efficiency.
- Implemented web scraping pipelines for both static and JavaScript-rendered websites using Python, Selenium, and BeautifulSoup to extract data from dynamic sources.
- Designed optimized Regular Expressions (Regex) to validate, clean, normalize, and extract meaningful information from complex datasets.
- Integrated backend services with MySQL, ensuring efficient data storage, retrieval, and API performance.
- Performed comprehensive API testing using Postman, validating request/response flows and identifying edge-case scenarios.
- Supported deployment workflows and environment-based configurations across development and production environments.
- Wrote reusable, maintainable, and well-documented code following clean architecture principles and industry best practices.
- Collaborated with QA engineers, business analysts, and cross-functional stakeholders in an Agile/Scrum environment to deliver production-ready features.

Python Developer Intern | Fidel Softech Pvt. Ltd. (formerly LinguaSol)

Jul 2023 – Dec 2023

Pune, Maharashtra

- Contributed to Python application development, debugging, and enhancement of internal software solutions.
- Assisted in feature development, bug fixing, and code reviews under the guidance of senior developers.
- Developed Python scripts to automate repetitive development tasks and improve workflow efficiency.
- Gained practical experience in backend development, software lifecycle management, and production workflows.

SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Backend Development:** FastAPI, Django, Django ORM, REST APIs, JWT Authentication, Pydantic, Uvicorn
- **Frontend:** React.js, Next.js, HTML5, CSS3, JavaScript (ES6)
- **Databases:** MySQL, PostgreSQL, MongoDB
- **AI & LLM:** LangChain, LangGraph, LangSmith, Ollama, OpenAI API, RAG, Vector Databases, Prompt Engineering, AI Agents, LLM Integration, NLLB Model, Hugging Face, Transformers.
- **Data Processing & Automation:** Regex, Web Scraping, Selenium, BeautifulSoup, Pandas, NumPy
- **Testing:** Postman, Pytest, Unit Testing
- **DevOps & Tools:** Git, GitHub, GitLab, Linux, CI/CD, VS Code

PROJECTS

AI Connect Application

Tech Stack: FastAPI, React, Ollama, OpenAI API, LangChain, MySQL

- Developed a production-ready AI chat platform supporting both local (Ollama) and cloud-based (OpenAI) large language models.
- Integrated multiple LLM providers with dynamic model selection and seamless API switching.
- Built REST APIs using FastAPI and developed an interactive React-based user interface.
- Implemented support for conversational AI, streaming responses, and vision-capable LLMs.
- Designed scalable backend architecture with secure authentication and efficient API communication.

AI Support Agent

Tech Stack: FastAPI, LangGraph, LangChain, RAG, SMTP, Vector Database

- Designed and developed an internal AI-powered IT Support Agent using LangGraph and Retrieval-Augmented Generation (RAG).
- Built a multi-agent workflow capable of analyzing user issues, generating responses, and automatically creating support tickets when required.
- Implemented document retrieval using vector databases to provide context-aware responses.
- Integrated SMTP email notifications for ticket creation and support communication.
- Designed agent workflows for issue classification, resolution generation, and escalation.

AI Text-to-Speech Application

Tech Stack: FastAPI, React, ElevenLabs API, TTSMaker API

- Developed a web-based Text-to-Speech platform supporting multiple commercial TTS providers.
- Integrated ElevenLabs and TTSMaker APIs to generate high-quality speech from text.
- Built responsive frontend interfaces for voice selection, audio generation, and playback.
- Designed backend APIs for request processing, audio management, and third-party API integration.

EDUCATION

B.Sc. Computer Science

Modern College of Arts, Commerce & Science, Pune

July 2021 – Apr 2023

CGPA: 8.25

--- END OF DOCUMENTATION ---
